Hello,

First of all I would like to sincerely thank the company for the opportunity I was given to be one of its employees. The skills and knowledge I've gained and the support of my team and lead have really helped me to do my tasks right.

Sadly due to unforeseen events, I will need to leave my post as CSR for long term health recovery. On May 3, 2023 I went to Vicente Sotto Hospital Emergency due to difficulty in breathing where I was diagnosed with pneumonia, the sickness which brought me inches away at death's door. After 2 weeks fighting for life in the hospital, my body has literally gone delapidated. It has unexpectedly deteriorated to a certain degree which made me look like I just turned 55 years old all of a sudden and activities of daily living went from easy to struggle.

As of the moment, though already discharged from the confines of the hospital and on the road to recovery, my family especially my mother fear that something unfavorable might happen should I force myself to go back to work. So they with my consent have decided to just focus on the recovery of my health for a few months before starting over.

Though it really saddens me to leave iPloy, however I have to make my 2nd life at the top of my priorities. So, At this point, I would like to render an immediate resignation from my post as CSR and I sincerely thank the company and everyone. It was a pleasure working with you all.

Sincerely,

Audie V Leopoldo Jr
