X-RAY REPORT

Both lung fields are clear. The trachea is in the midline. The heart is not enlarged. Both hemidiaphragms are sharp and distinct. The osseous thoracic cage showed right lateral curvature of the thoracic spine.

IMPRESSION:

1. DEXTROSCOLIOSIS OF THE THORACIC SPINE
2. NORMAL HEART AND LUNGS

JEE D. DOMAEL M.D., DPBR
SONOLOGIST/RADIOLOGIST
License#: 102561

The diagnosis should always be correlated with clinical and other laboratory parameters.
THANK YOU FOR THE REFERRAL.
